

OPEN THE GATE. LOSE THE **HARDWARE**.

GatEvo Connect is a cloud-connected access controller that lets visitors in with a shareable link or QR code: no keypad, no card reader, no fob to issue, collect or replace. Wires straight into the gate, garage or barrier ASD already supplies.

WHY IT SELLS

HARDWARE-VACANT ENTRY

Access Link issues secure one-time or time-limited links - visitors tap a code, the gate opens. Nothing exposed outside to vandalise, weatherproof or replace.

NO FOBS TO MANAGE

Contractors, deliveries and one-off visitors get a link that simply expires - nothing to hand out, chase down or deactivate.

RETROFIT ONTO ANY GATE

12–24V AC/DC input wires into any existing control board. An easy upsell alongside an automation quote, not a rip-and-replace job.

SCALES WITH THE SITE

From a single residential gate to a full multi-entrance access control system across commercial and hotel estates.

WHERE TO PITCH IT

GATED DEVELOPMENTS

Property managers issuing visitor & delivery access without a concierge or keypad.

COMMERCIAL & INDUSTRIAL

Multi-entrance sites needing centralised, cloud-managed access control.

CONSTRUCTION SITES

Temporary contractor access that expires on its own - no fob to reclaim.

HOTELS & ESTATES

Guest and staff entry alongside gates, barriers, doors and lighting.

HOW IT WORKS

01 WIRE IT IN

Fits any existing gate, barrier or door control board.

02 CONNECT IT

Ethernet, Wi-Fi or Bluetooth brings it onto GatEvo's cloud.

03 SHARE ACCESS

Send an Access Link, set Geo-Opening, or a Call-to-Open number.

INSIDE THE BOX

GATEVO CONNECT
Access Controller

PROCESSOR	Dual-core, 240 MHz
