CuegleCam® — Truly Wireless Off-Grid CCTV

CuegleCam is a fully self-contained, solar-powered CCTV camera built for sites with no power and no Wi-Fi. Three lenses give a combined 270° field of view, on-device AI tells people, vehicles and animals apart to cut false alerts, and a 4G/LTE connection sends verified events straight to your phone — wherever the site is. As ASD's authorised distributor for Ireland and Northern Ireland, we stock, support and back every unit sold.

HOW IT WORKS

01

DETECT

PIR & AI sensors wake the camera the moment something moves into view.

02

CAPTURE

Three 2MP lenses record a combined 270° view, day or night.

03

VERIFY

On-device AI filters the footage — person, vehicle or animal.

04

ALERT

A verified alert reaches your phone over 4G/LTE in seconds.

FEATURES

- 3× 2MP cameras, 270° combined field of view
- 10W solar panel + 40,000mAh battery
- 1.2A active draw / 0.9mA standby
- 4G/LTE connectivity, works off-grid
- On-device AI person/vehicle/animal detection
- Night vision & two-way audio
- 64GB local storage + 14 days cloud
- Operates from -40°C to +50°C
- Installed in under 60 seconds
- iOS, Android & macOS apps

IDEAL FOR

- Construction sites
- Farms & agriculture
- Plant & equipment security
- Storage yards & compounds
- Temporary events
- Remote infrastructure
- Perimeter & asset protection
