

97% Thefts Avoided with fogging system and alarm

17% thefts avoided only with an alarm

Traditional alarm systems are useful but they don't do enough to prevent theft.

They report an intrusion - but don't they block it.

A crime can be committed in less than 3 minutes and police response is a minimum of 15 minutes.

UR FOG IMMEDIATELY BLOCKS INTRUDERS

In a matter of seconds there is Zero Visibility...

**NO VISIBILITY
NO THEFT**

The room is quickly filled with thick fog that disorientates criminals and makes the items they intended to steal invisible. Criminals are instantly put off their theft and instead switch to concentrating on finding a way out.

Persistence of the thick fog means the site is secure until the police arrive and no further crimes can be committed.

COMPATIBLE WITH AJAX SYSTEMS 3 ACTIVATION MODES OF THE FOGGING SYSTEM

MOTION SENSOR

PHOTO VERIFICATION

PANIC BUTTON

BUT WHY FOG, AND NOT SMOKE?

Non-Pyrotechnical

There's none of the usual risks you get with smoke machines - explosion hazards, fires and difficulties in transportation.

No Residue

Your client won't have to fork out an expensive cleaning bill after activation. Their business can resume as normal.

Food Contact Safe

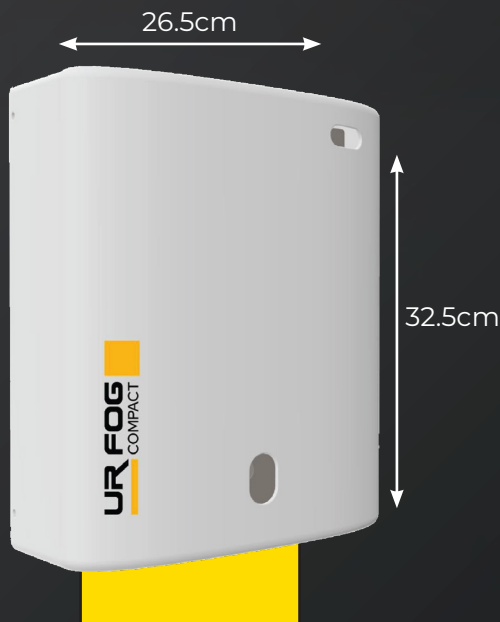

You can safely use these units in environments with food. This is thanks to the innovative White Out Food Grade fluid.

Significant Visibility Reduction

Fog produced has an increased density and is designed to persist as a barrier against potential intruders.

Re-usable

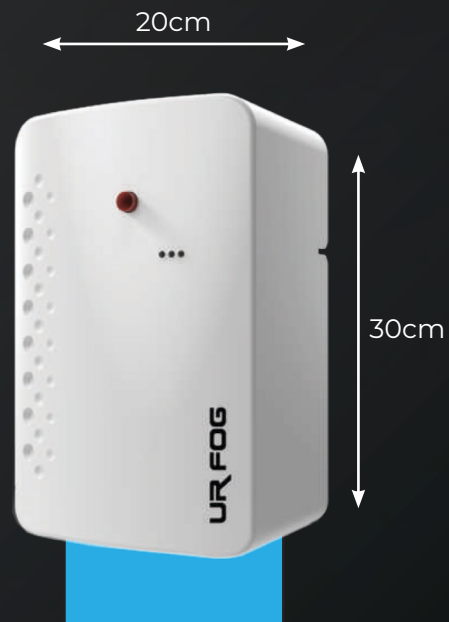

Smoke units only have one shot before the costly cartridges need to be replaced. UR Fog lets you adjust the shot time to get multiple uses from a single refill.

Compact 390

Weighing just 3.8kg and competitively priced for small businesses and residential.

**390 m³ of fog
in 50 seconds**

BAT 300

Battery powered and totally autonomous for 6 months without external power.

**100 m³ zero visibility
in 60 seconds**
